

## B.6 Host Connector

The Anybus CompactCom 30 is designed to use a compact flash connector as application connector. HMS offers a host connector, that is designed to simplify the mounting and to meet the demands for a secure and stable connection of the Anybus CompactCom 30 modules. The recommended PCB layout is presented in the figures below.

Recommended PCB-layout  
General tolerances  $\pm 0,05\text{mm}$

Please note that it is recommended to drill oval holes in the PCB, to enable usage of other connectors.  
**Warning:** Always verify that the dimensions of another connector is compatible with this design.

Manufacturer	Part No.	Web
HMS Industrial Networks	SP1137	For more information visit the support pages for Anybus CompactCom 30 at <a href="http://www.anybus.com">www.anybus.com</a>

The measurements of the connector are presented in the figure below.

**Note:** To ensure that you receive the correct measurements for the latest version of the contact, please consult the support pages at [www.anybus.com](http://www.anybus.com), where you will find all the latest available information for the connector.
