# Anybus NetTool for DeviceNet Release Information
# Version 3.5.1.3

Changes from version 3.4.1.3 to 3.5.1.3:

**Updated in version 3.5.1.3:**

- Bug fixes

- **Fixed problem with driver version info.** In random cases driver version was shown as 0. Internal ID: 0006004.

- Other changes

- **Updated copyright info in about dialog.**

**Updated in version 3.5.1.2:**

- Other changes

- **Updated application icon.**

- **Updated to version 2.9.1.1 of Transport Provider package in installer**

**Updated in version 3.5.1.1:**

- Improved functionality

- **Added support for "Invisible Parameters".** Internal ID: 0002841.

- **Added support for binary formatted 'QC enabled'.** Internal ID: 0003758.

- **Added support for binary-encoded parameter fields in EDS.** Internal ID: 0005461.

- Bug fixes

- **Fixed problem when creating EDS-file by uploading info from device.** When trying to create missing EDS-file by uploading info from device NetTool did stop when Vendor ID is read. It was only possible to press cancel to quit EDS Wizard.  Internal ID: 0005883.

- **Fixed problem with "Devices removed from configuration" icon.** Icon was missing for devices removed from configuration but still Scan list. Internal ID: 0005884.

- **Fixed problem with "DeviceNet RS232 Interface" driver.** No COM ports were shown as available if NetTool was not executed in Administrator mode in Windows 7. Internal ID: 0005877.

- **Fixed problem with when connect to X-gateway via COM port.** Getting "Failed to set network parameters for Anybus" -fault message every second try to connect. Internal ID: 0004311.

- **Fixed problem when reconnecting to X-gateway via COM-port.** Not possible to reconnect using "Go online" button or menu item. Internal ID: 0004312.

- **Added error message when trying to install EDS-files containing ProxyParam or ProxiedParam.** NetTool does not support modular slaves whish uses ProxyParam and ProxiedParam. Therefore now NetTool will not accept EDS-file containing those.

- **Changed setting name "Scan Interval" in scan list dialog to "Interscan Delay".** Internal ID: 0005459.

- **Added check if parameter data saved to network file (.net) fit into current device.** If a Network file created using an EDS-file with a larger number of parameters than the current one is loaded into NetTool, an error message will be shown and parameter values for non existing parameters will not be loaded. Internal ID: 0005841.

- **Added warning if an EDS-file is installed and replaces an already existing device.** Internal ID: 0005840.

- **Fixed problem when copying devices.** When starting to edit the name of a copy of a renamed device the name was changed back to the original device name. Internal ID: 0001358.

- **Fixed region specific problem with floats in EDS.** Now possible to install EDS-files containing REAL data type parameters with Decimal Symbol set to other than , . Internal ID: 0002793.

- **Fixed problem with missing parameters in parameter dialog.** Parameters that did **not** have an associated list of enum strings that followed after a parameter that did have an associated list of enum strings was missing in the parameter dialog. Internal ID: 0005412.

- Other changes

- **Updated to latest EDS-files.** Updated EDS files Anybus products in hardware library to latest releases. Internal ID: 0004228.

- **Updated Driver selection section in online Help.** Internal ID: 0004172.

**Version 3.4.1 Build 03:**

Previous official release.
