

# ZEUS FUSION SPLICE SYSTEM . . . advanced solutions for FTTx Networks

2.5mm  
Crocodile Fusion Alberino

**NEW**

1.25mm  
Crocodile Fusion Alberino

The system is based on the pre-assembled 2.5mm & 1.25mm “Crocodile Fusion Alberino”, allowing high performance field termination of SM & MM fibers from 250  $\mu$ m primary coated up to  $\varnothing$  3.1 mm optical cables.

## Features & Benefits

- Lightweight and compact design
- Fast and user-friendly operation
- MM & SM PC/APC Crocodile Alberino for termination of E-2000™, F-3000™, SC, FC and ST™ connectors
- Fiber-to-fiber splicing
- Fast and easy replacement of electrodes and “V-groove” as a single assembly
- Up to 100 splices without recharging the battery
- A comprehensive fiber/cable preparation and splicing tool kit
- All necessary tools for assembly of connector housings onto “Alberino”.

# DIAMOND SA

## Fiber Optic Tools

DIAMOND developed a new competitively priced Zeus fusion Splice System for high quality terminations of fiber optic connectors, indoor and outdoors.

The fusion splice is performed and protected within the ferrule assembly eliminating the need for expensive and space consuming splice housing, trays, holders, protectors, and fiber management.
