

NEW! NETUSB – Starting at \$99.95
Low cost USB to Ethernet Adapter

The NetUSB USB to Ethernet Adapter is a simple cable you add to your USB port to convert it to an Ethernet port. No changes are necessary to your USB port, just plug it in and you are on Ethernet. The USB port looks like a standard serial port and the NetUSB transfers the data from your USB or serial port through to the Ethernet port as if it was directly connected to the device on the other end of the cable.

Features

- Compact Size
- Small Device Server using Xport
- 10BASE-T/100BASE-TX compliant
- Auto-Sensing
- Ethernet Activity and Status LEDs
- Low cost
- 6-Page built-in Web Server
- Molded USB cable
- Power LED
- Powered by the USB port
- Wide temperature range –30 to 65 degC
- Encryption version available
- OEM and custom versions available

The NetUSB is based on the powerful Xport device server and this allows the NetUSB to have all the features of a high performance device server including a built-in web server for user custom web pages. The NetUSB supports transfer rates up to 1M baud between the USB and Ethernet interfaces.

The NetUSB is powered by USB. The NetUSB has a wide temperature specification –30 to +65 degrees C. These specifications allow the NetUSB to be used in commercial and industrial applications.

The NetUSB has many uses and can be used anywhere a device server is used. This includes applications like fire and security panels, vending machines, point of sale terminals, remote equipment management, IT management, access control, industrial control, home automation, instrumentation and many other applications that require a simple serial device to be networked.

Applications

- Fire and Security Panels
- Vending Machines
- Point of Sale Terminals
- Remote equipment management
- IT management services
- Access Control
- Industrial Control
- Home Automation
- Instrumentation
- Building Control

OEM and custom labeled versions of the NetUSB are available with a minimum of a 100 pieces order. Grid Connect is flexible with our customers and allows customization of hardware and software to best fit your requirements.
