

Bluetooth/Passive Plug-in module

The Anybus-CompactCom Bluetooth/Passive module supports Bluetooth 2.0 according to the Serial Port profile.

The module is used as a transparent wireless communication link between the automation device and a Bluetooth host. For the configuration of the Bluetooth features, the module supports standard AT-Command sets. The module is equipped with an internal antenna, and functions as a passive Anybus-CC module with a serial interface towards the electronics of the field device.

KEY FEATURES

- Physical layer converter for Bluetooth
- Completely transparent interface
- Module Identification against the application
- Bluetooth Class 2 SPP compatible
- Pre-certified (pending)

TECHNICAL SPECIFICATIONS

Size: 52 mm x 50 mm x 22 mm
Power Supply: 3,3 Volt
Temperature: 0-70°C
Baud Rate: Max recommended 115,2 kbps
Appl Interface: Serial
Wireless range: Up to 30 meter
Order Code: AB6212
