

RS-232/Passive Plug-In Module

The Anybus-CompactCom RS-232/Passive is a physical layer converter for the RS-232 communication standard. Being a passive Anybus-CompactCom module, no processing is performed on the serial bitstream. This module enables a transparent RS-232 channel using the Anybus-CompactCom slot. The module uses the serial channel of the application interface.

KEY FEATURES

- Physical layer converter for RS-232
- Completely transparent Interface
- Support for RTS
- Module Identification against the application

TECHNICAL SPECIFICATIONS

Size: 52 mm x 50 mm x 22 mm
Power Supply: 3,3 Volt (max 22,2 mA)
Temperature: 0-70°C
Baud Rate: Any up to 250kbps (recommended max 115.2kbps)
Appl Interface: Serial
UL file: E214107
Order Code: AB6207
