RS-485/422/Passive Plug-in module

The Anybus-CompactCom RS-485/422/Passive converts the serial bitstream of the serial host interface to RS-485/RS-422 and vice versa. It only acts on the physical layer, i.e. no processing is performed on the serial data itself. This module enables a transparent RS-485/422 channel using the Anybus-CompactCom slot. The module uses the serial channel of the application interface.

KEY FEATURES

- **Physical layer converter for RS-485/422**
- **Completely transparent Interface**
- **Module Identification against the application**
- **Can be enabled in either RS-485 or RS-422 mode**

TECHNICAL SPECIFICATIONS

Size:	52 mm x 50 mm x 22 mm
Power Supply:	3,3 Volt (max 170 mA)
Temperature:	0-70°C
Baud Rate:	Any up to 10Mbps (Max recomended 115,2 kbps)
Supp Features:	RS-485 or RS-422
Appl Interface:	Serial
UL file:	E214107
Order Code:	**AB6208**
