

# Single Chip for PROFINET IO

The new Anybus-IC PROFINET communication module provides instant PROFINET IO connectivity via the generic Anybus-IC application interface. Any device that supports this standard can also take advantage of the features provided by the module, allowing seamless network integration regardless of network type. Additional protocols can be implemented on top of TCP/IP or UDP using the transparent socket interface.

The data exchange can be monitored via the built in Web server, Modbus/TCP, or using event triggered email messages. SSI (Server Side Include) technology enables web pages and email messages to carry dynamic content such as I/O data, configuration setting etc.

Combining both the SCI & SSC interfaces this chip can send a total max of 144 bytes input & 144 bytes output data. In stand alone mode, no external microprocessor is required and the chip can handle up to 16 bytes input and output signals directly. Alternatively, the chip can be connected via a serial connection to any microprocessor and sends up to 128 bytes of Input and 128 bytes Output data.

KEY FEATURES	
	Profinet IO Real Time (RT) communications
	Shielded (FTP) unshielded (UTP) cables
	Modbus/TCP server
	Flexible file system with volatile and non-volatile storage areas
	Security framework
	Integrated FTP server provides easy access to the built-in filesystem
	Web server with dynamic content
	Email client capabilities
	Server Side Include (SSI) capabilities
	Device identity customisation
	Total Max 144 bytes of I/O data
	Common application interface permitting interchangeability with other networks
	Transparent TCP/IP socket interface
	SCI interface with (Modbus RTU protocol)
	SSC interface for data exchange (data in, data out, clock, load)
	Configuration and monitoring via PC configuration port
	CE marked, UL & cUL pending

TECHNICAL SPECIFICATIONS	
<b>Size:</b>	42 mm x 21 mm x 15 mm
<b>Power Supply:</b>	+5V max 250mA
<b>Temperature:</b>	-40- +85°C
<b>Baud Rate:</b>	100 Mbit/s
<b>I/O Input:</b>	SSC+SCI Max 144 bytes
<b>I/O Output:</b>	SSC+SCI Max 144 bytes
<b>Appl Interface:</b>	Shift register for stand-alone. Serial 2-wire for use with an external processor. 2nd serial 2-wire for diagnostics and monitoring
<b>Max I/O data SSC int:</b>	16 bytes Input & Output data
<b>Max I/O data SCI int:</b>	128 bytes Input & Output data
<b>Ethernet Features:</b>	PROFINET RT, Modbus TCP, IT functions
<b>Order Code:</b>	AB6005
