

Gateway Ethernet to MPI / PPI

Reduces costs because there is no need for a communications processor.
Visualization and Programming via Ethernet.

AREAS OF APPLICATION

- Ethernet interface via MPI / PPI port of the Simatic S7 (S7-400, S7-300 and S7-200)
- Programming the S7 without Softnet
- Remote maintenance of the S7 via LAN and WAN
- OPC communication with INAT Ethernet OPC Server
- Access to data blocks, flags, periphery, counter, timer

IBH Link S7 Plus

**Your Advantage:
6 Connections**

- Ethernet to MPI / PPI Gateway
- Programming functions via Step 7 and S7 for Windows
- Linking via a switch and the S7
- Standard Profibus plug
- Configuration via Ethernet diagnosis channel
- Data link via FDL telegrams

IBH Link S7 Plus

Ethernet Interface:	RJ45, 10 / 100 Mbps
Serial Interface:	MPI, PPI, Profibus 12 Mbaud
PLCs:	S7-400, S7-300, S7-200
Connections:	6 simultaneous PC connections
Power Supply:	24 V DC, external, 100 mA
Dimensions [in mm]:	L = 25, D = 65, H = 100
Cable Length:	2 meters
Order Number:	500-4000-02
