

# **TroubleShooting Kit (Ref 38010)**

## **Introduction**

**For engineers, installers and maintenance technicians we offer a professional PROFIBUS Troubleshooting Toolkit. It is equipped with all required tools to maintain and troubleshoot a PROFIBUS network efficiently.**

Support engineers of PROCEN TEC have extensive experience with demanding field work and created this first class toolkit, which they use themselves as well.

The toolkit is a robust blue carrying case which offers plenty of space for additional accessories (CDs, cables and documentation).

**Get the job done and keep your PROFIBUS installation running with this magnificent Toolkit!**
