When something goes wrong with your industrial network, spending time and resources trying to diagnose and resolve the problem is very costly. With NetDecoder, you can learn about impending problems before they occur. It’s an intuitive, passive network monitor and troubleshooting tool that offers high level views of your network activity and helps you understand your communications traffic.

In an environment that demands deterministic control and information exchange, having the right tool to help you understand your network activity is absolutely critical. And that is just what NetDecoder delivers for a broad range of serial, Ethernet and industrial protocols and buses.

NetDecoder
NetDecoder is a passive and easy-to-use network monitor that helps less-skilled troubleshooters understand what is happening on their communications networks. The Dashboard View, Network View Network View, Statistics Display and Frame Display are intuitive, easy to read, and quickly provide a wealth of information about the network. Although NetDecoder is simple to work with, it does provide a level of sophisticated and detailed information demanded by today’s network specialist.

NetDecoder’s Node Statistics
Network View enables you to see statistics on specific nodes including communications traffic details and node information for active nodes on the monitored side of the switch.

Individual Active Node Information
- Packets Transmitted and Received
- Bytes Transmitted and Received
- DNS Names
- Nodes In and Out
- Utilization Information
- Broadcast Information
- IP Address and MAC Address
- Named MAC Address
- NetBIOS Name
- Assigned User Friendly Names for Each Node

Product Highlights:
- PC-based Industrial Communications analyzer
- Supports serial, Ethernet & industrial buses

Serial
- DF1/PCCC
- Modbus RTU
- Modbus ASCII
- DNP3
- BACNet
- IEC-60870-5-102
- CC-Link
- IEC 60870-5-101
- IEC 60870-5-103
- BSAP Bristol Babcock
- ABB COMLI
- Emerson ROC
- Saia-Burgess S-Bus

Ethernet
- Modbus/TCP
- Profinet
- DNP3
- CC-Link IE
- EtherNet/IP (includes CIP and PCCC)
- Allen-Bradley CSP/PCCC
- IEC 60870-5-104
- PROFINET
- CC-Link IE
- Allen-Bradley CSP/PCCC
- Allen-Bradley DH-485
- Allen-Bradley Data Highway Plus

Industrial
- DeviceNet
- ControlNet
- Allen-Bradley DH-485
- Allen-Bradley Data Highway Plus
- CAN 2.0 A

NetDecoder is a must for:
- SCADA Engineers
- System Integrators
- Network Engineers
- Maintenance Engineers
- Field Service Personnel

Use the same tool Rockwell Automation Network Services engineers use globally.
Key Features

- Captures, decodes, timestamps, filters and displays data, and detects protocol errors (indicated in red) simultaneously, all live and in real-time.
- Data is also displayed in binary, octal, hex, and ASCII.
- Familiar tree (Explorer style) protocol decode display with single-click protocol filtering.
- Session notes and annotated bookmarks allow for quick identification of questionable messages.
- Log data to single or multiple files.

Together with our comprehensive line of USB hardware interfaces, Frontline’s NetDecoder protocol analyzer monitors and provides detailed timing, data, and messaging information for a wide range of communications protocols.

PC System Requirements

- Pentium 1 GHz or faster
- Windows XP (32-bit), Windows 7 (32-bit, 64-bit)
- RAM: 1 GB minimum, 2 GB recommended
- 50 MB free hard disk space
- One USB 2.0 Port
- Industrial buses require additional hardware
